6.25" = 15,9cm opening

Foil Applicator With Starter kit

You don't need to cut out – the foil sticks neatly to ANY toner (which is heat activated through the Minc)

The Minc machine is a heated system for foil application.

You can choose from a number of items from Heidi to embellish or create your own design to apply foil to by simply printing from a toner based printer, such as a laser printer.

Electric current: 5.5A, Voltage: 220-240VA, Power: 110W, Frequency: 50 Hz, Max Temp: 160c

This package contains one 5-3/4x19-1/2x2-1/2 inch foil applicator, one transfer folder, one gold foil sheet and three starter tags.

- Foil applicator, transfer folder, foil sheets, and tags
- 6 different heat settings
- Use with a variety of materials, including overlays, vellum, coated paper, cardstock, and chipboard
- Forward and reverse directions
- For use with Minc foil system

Use any brand of foil - see foils [here](#)

Foil adheres to any laser toner (not only black)

This is not the same as a laminator

use it with sticker paper, copy paper, scrapbook paper and card stock and it works great!

Foiling: AC - Minc Foil Applicator & Starter kit (Mini)

1. CHOOSE A MINC™ PRODUCT OR PRINT YOUR OWN WITH A LASER PRINTER
