Description

Water-Slide Laser Decal Paper

Print your own decals at home using your PC and laser printer. It is easy to print your own water slide decal paper which you can put on candle, soap, ceramic, glass and many other gloss finished items.

Paper Thickness: 170gsm

Size: A4

Colour: **Clear** for bright coloured items

How To Use

1. Edit the images or photos which you want to print on the decal paper
2. Load your printer with your laser water-slide decal

3. Print the image from your computer onto your laser water-slide decal paper with your laser printer
4. Spray a clear [topcoat](#) over the image and leave it for an hour to dry
5. Cut out the image you want with home scissors.
6. Place it in water for about 60 seconds and then transfer it onto of material you wish to decorate. Wipe excess water off your decal transfer using gentle strokes with a rubber Scrubber.
7. Allow to set dry for 3 hours at least.

Use [magic coating paper](#) to seal (sold separately)

If you want better gloss and hardness, you can apply overcoat using a [polyurathane spray](#).

*In order to make the decal stronger, you can bake your item:

- Ceramics, Glass, Metal 140C for 20min
- Wood 140C for 40min
- Varnished wood 100C for 60min

Wash resistant but not wash proof

If you want to put the decal on a dark colour surface (such as black, cobalt blue, choco brown) we suggest you use our white decal paper instead of normal clear decal paper.

Discount automatically applied when buying 10, 50 or 100+ sheets
